Please join the South Atlantic Chapter of Construction Management Association of America for our 2009/2010 Breakfast Meeting Series.

LEED (Leadership in Energy and Environmental Design) has become a hot topic in today's construction and development industry. The credits found in the USGBC's LEED standards are well accepted as good short-term and long-term practices for building owners and users. However, these practices and benefits do not come without a price. The risk associated with building green needs to be shared equally amongst all project stakeholders.

Join us to hear a panel discussion on how to best share the risk for all parties involved in the projects from the Owner and Construction Managers, to the Design Firm.
