Please join the South Atlantic Chapter of Construction Management Association of America for our 2009/2010 Breakfast Meeting Series.

In today's environment, competitive bids are increasing everyone's risk before, during and after construction. New tools and project management technology available today will help ensure projects are delivered onsite and to the owner's expectations.

Join us to hear a panel discussion between various project team members from the owner to the general contractor.

Other topics to be discussed:

- Increase in quality or products delivered
- Ways to reduce risk and improve accountability
- Technology to save time and money during construction
- Knowledge loss from preconstruction to facility management
