Directions:
We are located at the corner of 10th and Peachtree in Midtown.

This Month's topic:

The Basics of Precast Concrete

Our guest speaker will be:
George Spence - Metromont

George has been with Metromont for the past fourteen years in sales and business development, working out of the Dalton, Georgia office. Prior to joining Metromont he had his own architectural precast plant, Cook & Ingle Company and has been in the precast concrete industry for forty years. He has a BS in Physics and Math along with an MBA from the University of Alabama.

Syllabus (1 hour HSW/SD learning unit)

The program is The Basics of Precast/Prestressed Concrete (AIA Program BP100) with PCI as the registered provider (Provider #G123) for 1.0 HSW Learning Credit.

Following is an outline of the learning objectives of the presentation:

1. Understand the potential of Precast/Prestressed Concrete
2. How precast concrete building systems can be designed to meet various end-uses
3. How architectural, structural systems are being used to create total precast buildings
4. The current technology of precast parking and school structures
5. The design possibilities; use of color, form and texture; including cast-in thin brick
6. The sustainability, LEED[®] and energy savings benefit of precast
