Directions:
We are located at the corner of 10th and Peachtree in Midtown.

This Month's topic:

IBC 2006 Special Inspections

Our guest speaker will be:

Milt Schreiber – Geo-Hydro Engineers

Milt Schreiber is the Managing Principal of Geo-Hydro Engineers, Inc., a geotechnical engineering, materials testing, and environmental consulting firm founded in 1980. He is a 1976 Georgia Tech graduate in civil engineering, a founding partner of Geo-Hydro, and a Member of the American Society of Civil Engineers (ASCE). He has been involved in geotechnical engineering and construction materials testing on projects of all types for 35 years.

Syllabus (1 hour HSW/SD learning unit)

IBC 2006, Special Inspection

IBC 2006's Chapter 17 (Special Inspections) is a hot topic among owners, developers, architects, structural engineers, and testing agencies. Compliance is mandatory in Georgia, but often the building official does not enforce it, nobody wants to pay for it, and many people are uncertain what is really required. We will give you a good handle on the issues facing the design team and provide a roadmap for guiding your projects through the steps necessary to comply with Chapter 17.

Here are some of the key points from the presentation:

1. The definition of "Special Inspection".
2. Why do inspections?
3. Why Chapter 17 is often ignored?
4. A simple cookbook approach to compliance.
5. A detailed look at the Schedule of Special Inspections.
6. How to select qualified testing agencies.
7. What to look for in inspector qualifications.
