Directions:
We are located at the corner of 10th and Peachtree in Midtown.

This Month's topic:

BIM Demonstration

Our guest speaker will be:

David Moody, LEED AP BD+C

David is a LEED Accredited Professional with an architectural background and extensive technology experience. His history of using and maintaining Autodesk Revit goes back to 2006 when he started utilizing the software for automotive commercial design. Since then he has taught architecture design and technology in Canada and the United States, helped transition a midsize firms to Revit, and worked on an extensive list of project types. David's work includes multifamily housing, automotive commercial, single family residential, senior housing, specialty higher education renovations, medical research facilities, office buildings, and most recently military renovations and construction.

Syllabus (1 hour HSW/SD learning unit)

Overview

A brief overview of BIM software

Keys to BIM

Visualization – Revit

A discussion on the basics of 3d modeling, project coordination, project benefits, and efficiency in construction document production.

Coordination - Revit/Navisworks

Revit model coordination and Navisworks model coordination basics and benefits.

Construction sequencing - Navisworks

Some small specific examples of construction related phasing.

Quality Control - Vela Mobile

Going beyond drawing production and taking information to the field.

Recap
